PROFESSIONAL SUMMARY

Results-driven Computer Engineering graduate (June 2026) with hands-on experience in SQL-driven reporting, data pipeline validation, and interactive BI dashboard development. Skilled at translating ambiguous business requirements into precise technical specifications, surfacing KPI insights for non-technical stakeholders, and ensuring data-output accuracy through systematic QA checks. Seeking to apply analytics, reporting, and quality-control expertise as an **Associate Business Analyst – Data & Reporting**.

TECHNICAL SKILLS

Querying & Languages:	SQL (MySQL, PostgreSQL, SQLite), Python (Pandas, NumPy), Jupyter Notebook
BI & Visualisation:	Tableau, Power BI, Plotly, Matplotlib, Seaborn, Recharts
Data & Databases:	Relational Databases (MySQL, PostgreSQL), Firebase, Microsoft Excel, Git & GitHub
ML & Analytics:	Scikit-learn, TensorFlow, Keras — Classification, Clustering, Anomaly Detection, NLP
Business & Process:	Requirements Analysis, KPI & Dashboard Reporting, Stakeholder Management, QA & Data Validation, Agile, Documentation

PROJECTS

Job Analytics Portal — NullClass Data Analytics Internship

2024

Python (Pandas) · SQL · Tableau · Next.js · Claude AI

- Extracted, cleaned and validated **50K+ job-posting records** using Python/Pandas — resolving nulls, duplicates, and type mismatches — reducing downstream reporting errors by ~30%.
- Wrote optimised SQL queries across **6+ relational tables** to surface hiring trends, in-demand skills, and salary benchmarks, cutting ad-hoc data-pull turnaround by **40%**.
- Designed and deployed **2 interactive Tableau dashboards** translating stakeholder business requirements into technical specs; advanced filtering reduced self-serve analysis time by **50%**.
- Monitored data-refresh pipelines and troubleshooted reporting discrepancies; implemented validation checks to maintain **99%+ output accuracy** — directly mirroring QA and control-management responsibilities.

Airline Market Demand Analysis

2024

Python · Flask · Plotly · Pandas · SQL

- Ingested, cleaned, and modelled **200K+ airline booking records** from multiple internal sources using Pandas and SQL, building a consolidated dataset for operational reporting.
- Built interactive Plotly dashboards (filterable by route, origin/destination, date range) surfacing popular-route trends, price movements, and peak-demand periods — enabling data-driven stakeholder decisions.
- Auto-generated route-level demand scores and recommendations, cutting manual analysis effort by **60%**; implemented pre-cycle sampling controls to validate data integrity before each reporting run.

WhatsApp Chat Analyzer

2023

Python · Pandas · scikit-learn · FastAPI · Recharts · NLP

- Engineered an end-to-end analytics platform parsing **100K+ lines** of chat exports with automated extraction, transformation, and data-quality validation at scale.
- Defined and computed behavioural KPIs (composite engagement scores, churn risk indicators, cohort-survival curves); applied NLP sentiment analysis to deliver exportable PDF/CSV/HTML reports for non-technical stakeholders.
- Conducted structured QA testing on the NLP pipeline, identifying and resolving **3 data-processing defects** prior to production release — ensuring report integrity.

EXPERIENCE & LEADERSHIP

Social Media Head — VCET Students' Council

Aug 2025 – Present

Vasai, Maharashtra

- Led digital content strategy across council channels, using engagement metrics to drive data-informed decisions — resulting in **35% audience growth** and **10% rise** in external event registrations.
- Managed multi-stakeholder communications, setting clear expectations and reporting campaign progress to council leadership, mirroring stakeholder-management responsibilities in a corporate BA context.

Senior Outreach Associate — Microsoft Student Learning Club (MLSC), VCET

Sep 2024 – Present

Vasai, Maharashtra

- Designed data-informed outreach campaigns that increased student engagement by **60%**; iterated messaging strategy based on real-time metrics, delivering a further **15% uplift**.
- Coordinated cross-functional communications between technical and non-technical teams, ensuring clear, timely reporting updates — directly applicable to partnering with technology teams in a data & reporting role.

EDUCATION

Bachelor of Engineering in Computer Engineering

Expected June 2026

Vidyavardhini's College of Engineering & Technology (VCET), Vasai, Maharashtra

Relevant Coursework: Data Warehouse & Mining, Database Management Systems, System Design, Algorithms, Operating Systems

CERTIFICATIONS & TRAINING

- Data Analytics Internship & Training — NullClass
- Full Stack Web Development & C++ — Devtown | Android App Development in Java — Pregrad
- Android Development with Kotlin (Workshop, 2024) | Multiple Udemy certifications in CS & Data Analytics

KEY ACHIEVEMENTS

- Winner, Maharashtra State Innovation Challenge (MSIC) — District Level, 2024.
- Published & presented IEEE research paper on *Truth Lens* (AI misinformation/deepfake-detection platform) at IC3ET conference, VCET.
- Winner, Robotics Line-Follower Competition — SPIT, 2025 | Winner, Ad-Mad Show — Zeal, 2023.
- Finalist / Participant: EDITH AI Agent Buildathon, MegaHack, Coherence, TechBlitz, Recursion 7.0, Technoxian World Robotics Championship (2023–25).
